

GSD Slipsheets vs Wooden Pallets – Cost Analysis

Wooden Pallets	
Cost: 30,000 units x \$10 per pallet	\$300,000
Repairs : 30,000 units x 20% x \$3 per pallet	\$18,000
Total Cost:	US Dollar \$318,000

Plastic Slipsheets	
Cost: 30,000 units x \$1 per sheet	\$30,000
Repairs: nil	0
Total cost:	US Dollar \$30,000

Cost Comparison – Savings using slipsheets

\$318,000 - \$30,000 = \$288,000 Savings

\$30,000 slipsheets can be loaded in one truck.

In terms of pallets, 30,000 pallets must be loaded more than 600 trucks. Obviously, an increase of cost is involved in labour hours for loading, storage, and product damage and inventory control. Most importantly, the warehouse space would be decreased.
